

AKBOPE BAKYTKELDY

GRAPHIC DESIGNER

Visual identity / Campaigns / Editorial / Posters

OPEN TO FREELANCE, PART-TIME AND REMOTE WORK

PROFESSIONAL PROFILE

Astana-based graphic designer and Software Engineering student at Astana IT University. I create visual identities, campaign concepts, poster systems and editorial layouts for ideas that need a clear and memorable visual voice. My approach combines expressive typography, unexpected colour, strong hierarchy and playful composition.

EDUCATION

Astana IT University

Software Engineering / Current student

Astana, Kazakhstan

My technical studies support structured problem-solving, attention to systems and confidence working across digital production environments, while my portfolio remains focused on graphic design.

DESIGN FOCUS

01

Identity

Visual language, logo direction, typography and colour systems.

02

Campaigns

Art direction and repeatable social content systems.

03

Editorial

Clear hierarchy, modular layouts and image-type relationships.

04

Posters

Expressive composition, display typography and visual rhythm.

WHAT I BRING

A graphic-design practice built around concept, visual systems and consistent execution across a complete set of assets.

CORE CAPABILITIES

BRAND & IDENTITY

Visual identity direction, early logo exploration, typography, colour systems, packaging concepts and brand character.

ART DIRECTION

Mood definition, image selection, visual references, composition principles and a consistent point of view.

CAMPAIGN DESIGN

Campaign concepts, multi-post social series, repeatable layouts, digital advertising graphics and content rhythm.

EDITORIAL DESIGN

Editorial systems, modular frames, information hierarchy, image-type relationships and sequence across a series.

POSTER DESIGN

Expressive display type, focal-point development, contrast, scale, print-inspired texture and visual experimentation.

FINAL DELIVERY

Coherent asset sets, layout consistency, format-aware preparation and a final visual check across the complete project.

CREATIVE PROCESS

01 / DISCOVER

Clarify the purpose, audience, format and emotional tone.

02 / DEFINE

Choose the core concept and establish the visual direction.

03 / BUILD

Develop typography, colour, layout rules and image treatment.

04 / EXPAND

Apply the system across a complete campaign or collection.

05 / REFINE

Check hierarchy, consistency, spacing and visual rhythm.

06 / DELIVER

Prepare the final artwork for its intended format and use.

WORKING STYLE

- Self-directed and comfortable developing an idea from first concept to finished visual set.
- Curious about unfamiliar formats and willing to test several visual directions before refining one.

PROJECT EXPERIENCE

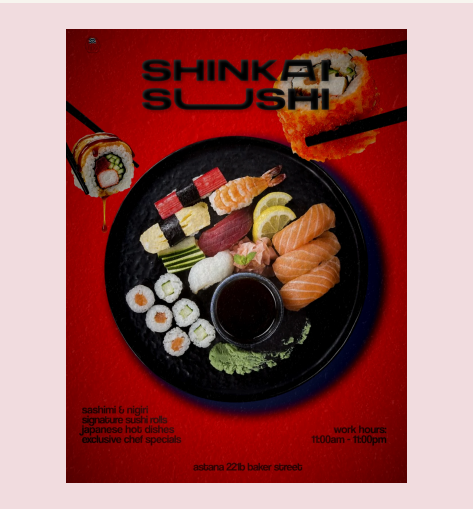

Independent concept work demonstrating art direction, visual-system thinking and graphic execution.

01 Type & Feeling

Poster design / Typography

- OVERVIEW** A collection of three independent poster studies: Weekend Blooms, Lalagul and the LNGSHOT music poster.
- RESPONSIBILITIES** Defined a distinct mood for each piece; developed hierarchy, display typography, colour contrast, image treatment and composition.
- RESULT** Three finished posters with separate personalities, presented together as a focused typography and composition collection.

02 Sushi Social Club

Campaign design / Art direction

- OVERVIEW** A nine-post concept campaign that gives an imaginary sushi club the attitude of a fashion editorial.
- RESPONSIBILITIES** Created the visual direction; balanced close food crops with oversized type; connected varied compositions through deep red, cream and black.
- RESULT** Nine related social designs that feel consistent as a campaign without repeating the same layout.

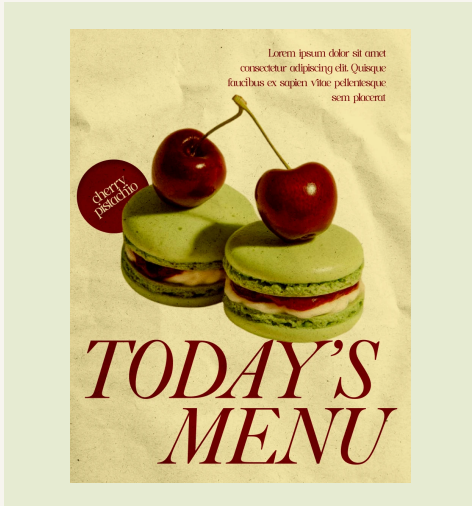

03 Claude Magazine

Editorial design / Art direction

- OVERVIEW** An eight-post editorial concept exploring a warmer and more human visual language for an AI topic.
- RESPONSIBILITIES** Built modular frames, conversational headline hierarchy, a cream-coral-blue palette and tactile texture across the series.
- RESULT** Eight connected editorial posts. Independent concept work and not an Anthropropic commission.

MORE SELECTED WORK

Campaign and early brand exploration supported by a clear design process and a strong interest in expressive visual systems.

04

Macaroon Club

Campaign design / Art direction

- OVERVIEW** A playful nine-post dessert campaign built around colour, texture, product imagery and oversized typography.
- RESPONSIBILITIES** Developed the pistachio-green, cherry-red and warm-paper palette; alternated product-led and type-led layouts; maintained a shared framing language.
- RESULT** Nine finished campaign posts with a recognisable mood and enough variation for a complete social series.

05

Kok Coffee

Brand exploration / Graphic design

- OVERVIEW** An early coffee-brand concept exploring how a name can establish visual character in one focused composition.
- RESPONSIBILITIES** Tested the relationship between naming, display typography, colour and product imagery to define an initial direction.
- RESULT** One completed concept graphic, presented as an early visual exploration rather than a full identity or client commission.

ADDITIONAL STRENGTHS

SYSTEM THINKING

I look for repeatable visual rules so a project can grow beyond one composition.

VISUAL RANGE

My selected work moves between editorial structure, campaign rhythm and expressive poster design.

STRUCTURED PRACTICE

Software Engineering studies reinforce organisation, iteration and careful problem-solving.
